Best investment portfolios

Best investment portfolios since 1989

Thank you!

Thank you for downloading the free example of our e-book – [The 20 best portfolios since 1989.](#)

Saving for the future and making your money grow is **extremely important** but what is the best way?

That's where the premium portfolios can help you. **They can help you:**

- If you want to secure your retirement - you need your money to compound at a good rate.
- If you are tired of buying and selling stocks and getting a terrible result.
- If you want to be sure that your portfolio is the absolute best that money can buy.
- If you are planning on retiring early in your 40's or 50's.
- If you are simply looking for the best performing portfolio ever designed by investing professionals.
- If you're planning for a future goal but don't know how to get there.

THESE PORTFOLIOS HAVE GIVEN YOU THE HIGHEST RETURNS

Since the early 2000's we've documented investment portfolios. We did this to find out which portfolios offer the highest returns. We wanted a **shortcut to riches!** (that sounds salesy, but it is true).

Our thinking was "why pick a portfolio with a **7% return** over a portfolio with a **10% return**, when they're both easy to implement?"

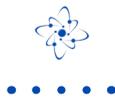

We wanted to find the **secret sauce** behind the high returning portfolios. We think we found it.

To date we have benchmarked over **800 portfolios including ESG portfolios**, so we have a good basis for comparing portfolios to one another.

No one has ever done this kind of work before.

This gives us a **unique advantage** that we can present to you.

All of the portfolios in our book have stood the test of time and have performed wonderfully– the oldest portfolio is almost 3000 years old! It too has performed wonderfully (that portfolio is detailed in this sample!).

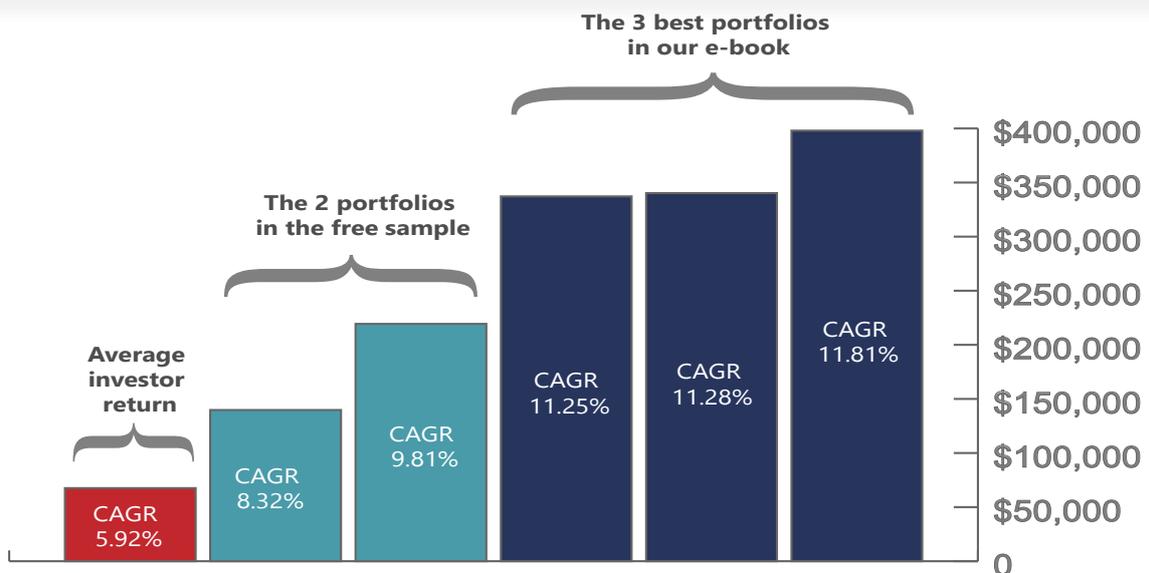

HOW WILL A SUPERIOR PORTFOLIO HELP YOU?

Take a look at the bar chart below. It shows the difference in accumulated wealth between an average investor's return as measured by Dalbar (an investment research group) and the **3 best portfolios in our e-book**.

We have also included the two portfolios detailed in this sample in the bar chart.

What you'll see is that the difference is **massive**.

Here's how much your money would have grown if you invested \$10,000 in 1989

There is a huge difference from what the average investor makes to what a high performing portfolio can do to your wealth.

It is not even close. The reason for this is the compounding effect of money. Even a few percentage points of extra return will make a massive difference over time.

Why pick a 9.81% portfolio when you can pick a 11% portfolio?

SUPERIOR PORTFOLIOS BY THE NUMBERS

Below you can see the exact numbers for the comparison. The table is sorted from best the performing portfolio to worst performing portfolio.

The best performing portfolio generated almost **6 times more dollars** than the average investor received!

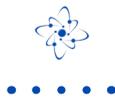

NAME	RETURN SINCE 1989	\$\$\$
Premium Portfolio 1	11.81%	\$397,980
Premium Portfolio 2	11.28%	\$340,224
Premium Portfolio 3	11.25%	\$337,210
The Talmud Portfolio (see free sample)	9.81%	\$219,373
Scott Burns Five Fold Portfolio (see free sample)	8.32%	\$139,761
Investor's Average Returns (Dalbar)	5.92%	\$67,559

If you just went with the Talmud Portfolio (which is VERY easy to implement) you would have received over **3 times more money** than the average investor!

You can implement the Talmud Portfolio today for free if you want. All the details are below.

So right there you already have a leg up over the average investor.

But, you would have done **even better** if you had implemented one of [portfolioeinstein's premium portfolios](#).

WHAT ARE THE PREMIUM PORTFOLIOS?

The premium portfolios is an e-book researched and designed by portfolioeinstein.com, which is a site that has benchmarked the largest amount of investment portfolios.

The e-book details the 20 highest returning portfolios since 1989. The portfolios are designed by investment professionals and investing superstars. They are time-tested and recession-tested. They perform **awesomely** over long periods of time.

You are probably thinking that the premium portfolios are super complicated portfolios. They must be hard to implement if they are so good right?

They are not complicated. Most of the portfolios have just a few ETFs that you need to buy in order to implement them. They are **easy** to implement and **easy** to maintain.

The premium portfolios are **not expensive to maintain either**. In the e-book you will find that we recommend the best ETFs you need to buy to implement the premium portfolios. We have made it easy for you.

The best part of the premium portfolios is that they are buy-and-hold portfolios. You literally only need to build a portfolio once and let it be!

So for only a few cups of Starbux coffee you will be able to propel your wealth well beyond what the average investor is capable.

If you decide to move your portfolio to the next level with the premium portfolios you can be pretty sure that there are no better portfolios out there that you can implement.

Quite simply: You are getting the results of the broadest research on real portfolio returns!

We hope you want to take your portfolio to the next level!

THE SAMPLE PORTFOLIOS

In the next few pages you will get a sneak-peak of what you can expect if you decide to buy the premium portfolios.

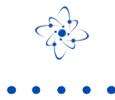

Each portfolio is divided into 4 sections:

- Description, is a short description and origin of the portfolio.
- Performance, shows how the portfolio has performed in various time periods.
- Portfolio allocation, show which ETFs you need to buy and in which proportion.
- Portfolio allocation pie-chart, shows you the portfolio allocation visually.

The two portfolios presented below are not part of the premium portfolios. The premium portfolios have performed much better!

We hope you enjoy this free sample.

Now enjoy!

1. Scott Burns Five Fold

DESCRIPTION

Scott Burns founded Assetbuilder.com. Scott Burns also made the famous Couch Potato portfolio. His firm Assetbuilder uses the Couch Potato portfolios as a starting point.

Scott Burns has evolved the concept of the Couch Potato portfolio the result is 9 other portfolios of which the Five Fold portfolio is one of them.

The portfolio is very diversified. It has 40% bonds which will provide downside protection in exchange for greater returns as bonds have historically offered lower returns than stocks.

PERFORMANCE

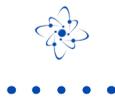

Here you can see how the portfolio has performed. You can also see what the maximum drawdown has been. Finally the table shows the expense ratio if you implement the portfolio using the recommend ETFs.

RANK	NAME	2021	10 YEARS	SINCE 1989	DRAW-DOWN	EXPENSE RATIO
1	Scott Burns Five Fold	15.51%	8.59%	8.32%	-23.04%	0.07%

ASSET ALLOCATION

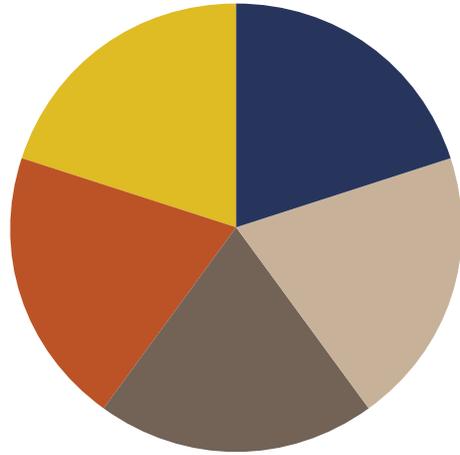

Below you can see the asset allocation for the portfolio. You can also see the recommended ETFs for the asset class.

- 20% US Total Stock Market (VTI)
- 20% REITs (VNQ)
- 20% International All-World ex-US (VEU)
- 20% TIPS (VTIP)
- 20% Non-US Bonds (BNDX)

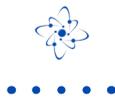

PIE CHART

Below is a visual representation of the portfolio.

INTERNATIONAL ALL-WORLD EX-US US TOTAL STOCK MARKET
REITS NON-US BONDS TIPS

2. The Talmud Portfolio

DESCRIPTION

“Let every man divide his money into three parts, and invest a third in land, a third in business and a third let him keep by him in reserve.”

So it is written in the Talmud, a record of debates among rabbis about Jewish law dating as early as 1200 B.C.

The portfolio has performed surprisingly well over the decades. You could also keep 1/3 in cash instead of bonds.

PERFORMANCE

Here you can see how the portfolio has performed. You can also see what the maximum drawdown has been. Finally the table shows the expense ratio if you implement the portfolio using the recommend ETFs.

RANK	NAME	2021	10 YEARS	SINCE 1989	DRAW-DOWN	EXPENSE RATIO
2	The Talmud Portfolio	21.48%	10.55%	9.81%	-24.03%	0.06%

ASSET ALLOCATION

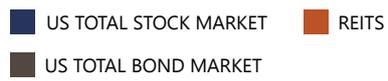

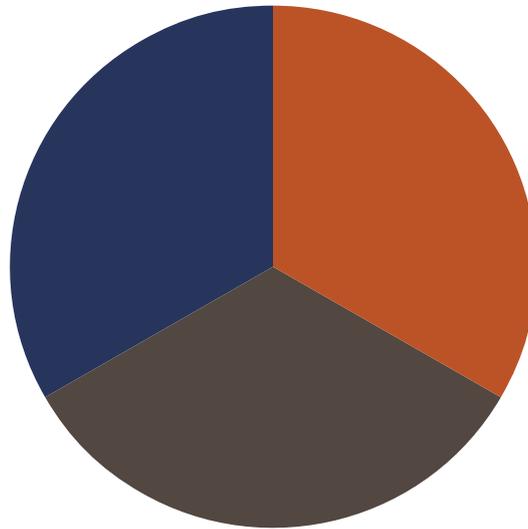

Below you can see the asset allocation for the portfolio. You can also see the recommended ETFs for the asset class.

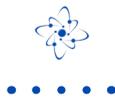

- 33.33% Total US Market (VTI)
- 33.33% Real Estate - REIT (VNQ)
- 33.33% Total Bond Market (BND)

PIE CHART

Below is a visual representation of the portfolio.

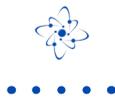

You next steps in you investing journey

Again thank you for reading through this.

If you think you are ready to implement a high performing portfolios or you just want to make sure your current portfolio is as good as it gets you can [purchase the entire e-book here.](#)

The e-book is very low priced and we're not making millions on this. We do it because it is our interest and your purchase will help keep the lights on.
